NATURAL LANGUAGE UNDERSTANDING ENGINEER

Excited to work at the heart of a brand new technology? Thrilled and skilled to work with NLP, machine learning and/or networks? Then join a fast-paced Berlin startup!

Aaron.ai is developing an artificial intelligence to automate voice-based customer service interactions. We are looking for motivated students with a background in machine learning, NLP, networks and the like, who are as excited as we to design and implement cutting edge service technology as a part-time employee or a student intern.

WHAT WE OFFER

- Impact at the heart of the company
- Scrum-based teamwork and modern technology stack
- Responsibility for own workstream
- Coaching from university experts and work with experienced CTO

WHAT YOU HAVE

- Knowledge about NLP concepts, first experience in implementation
- Knowledge about machine learning
- Solid knowledge about at least one object oriented language (ideally Python)
- Ideally, knowledge about linux, docker and networks

YOUR TASKS AHEAD

- Identification and test of NLP & machine learning toolkits
- Development of product features
- Deploying AI applications
- Implementation and lead of one clearly separated dev workstream
