

Preh Car Connect GmbH is a young company founded in April 2016, but our origins in building automotive infotainment systems are going back to 1997. We started with a small staff developing navigation-systems from scratch and evolving since then towards now 1400 employees and more than 300 million revenue in 2016.

Our products are supporting one of the biggest car manufactures in the world with first class knowledge in:

- Navigation
- Data Services
- Connectivity
- Tuner & Software Defined Radio
- Base System Engineering
- Hardware Design

As an automotive company we know our products are used over years. Thus we have a strong focus on the quality of our hardware and software products.

Software Developer - Distributed Systems (m/f)

Your Tasks

- Work on the requirements analysis, concept creation, software design, implementation, testing and bugfixing of our navigation cloud services backend.
- Create high quality and secure services from scratch or do further enhancements and optimization that suits our microservices architecture.
- We are looking for a generalist in distributed system development
- It does not matter if you are at home in Java, Scala, Golang, Python, Rust, Elixir, C++ or any other language as long as you are passionate in development, follow a solution driven approach to get tricky things done.
- You love to write elegant code and test driven development is not a foreign word for you.
- Beside you should not be afraid to fight with cutting edge technology to bring it into a production ready state.

Your Profile

- Masters degree in Distributed Systems Engineering or in Computer Science or equivalent work experience
- Open and curious mind in the distributed systems domain
- Problem analytic
- Solution driven thinking
- High demand development
- Test driven development
- Team player, enjoy communicate and collaborate with others
- Not lazy to document
- Communication in English or German

Take advantage of your opportunity at Preh Car Connect and apply with your full documents, including the JobCode, your salary presentation and the possible entry date, preferably with the application portal.
