

Job announcement IT (Berlin)

Core Team Member Space Startup LiveEO

The young Berlin based Earth Observation Startup LiveEO is growing. With our product „LiveEO“ we are delivering answers from above with an intelligent combination of different Earth Observation data sources. We are Finalist of Europeans biggest Space Competitions Galileo and Copernicus Masters 2017. For our core team we are looking for a person with academical IT Background in the area of Berlin/Brandenburg.

To join us you should have interest in the following topics:

- Python Coding
- Image recognition
- Machine Learning
- Cloud Processing (AWS)
- Data Science

Gained experience in those fields are good but not necessary.

LiveEO is the first private real-time earth observation application and makes use of the synergies of EO data and geolocation services. Based on Copernicus data, LiveEO determines the most efficient combination of public and commercial satellite data, connected UAVs and High-Altitude-Pseudo-Satellites. LiveEO provides answers from above for customers requiring short reaction times and long duration observations enabled by UAVs like DJI and h-aero. Do you want to be part of the team who realizes this disruptive space approach?
